

Dear Parents/Guardians of 9D,

I am excited to be teaching the Science 9 course for your learner this 2020-2021 academic year!

This year in Science, we will start off by filling in the gaps of what was missed from grade 8. We will explore key concepts such as plant and animal cells, diffusion, osmosis, cell division, mitosis and miosis. From there we will continue on to study:

- Reproduction (Biology)
- Atoms and Elements (Chemistry)
- Electricity (Physics)
- Space Exploration!

Parents/Guardians are welcomed to follow students' progress on PowerSchool and can contact me via email at melaniesmith@gnspe.ca. I also have Google Classroom set up and the code is: rmlco6e. Do not hesitate to contact me if you have any questions or concerns. 😊

Mme. Smith
